The patent-pending 7501 Dissolvable Frac Plug combines the latest in dissolvable technology with our innovative frac plug design to deliver the most reliable, predictable and efficient dissolvable plug on the market.

**RELIABLE.**
- Rated for 10,000 PSI treating pressure
- Patent-pending anti-preset mechanism
- No tensile loading during setting

**PREDICTABLE.**
- Configurable to dissolve in both fresh water and brine
- Integrated degradation catalyst allows you to accelerate dissolution in fresh water

**EFFICIENT.**
- Single-slip design means less material required to dissolve
- Each plug is delivered with an integrated adapter kit for faster rig up
- Compatible with standard setting tools
